Donna Chapman, Elaine Scheerschmidt and
Virginia Nielsen

Thank You!

*A heartfelt thank you to all the volunteers,
financial donors, coffee patrons and CFEP. It is
because of you that we had a very successful
2011.*

Good-bye Lloyd Smith

It is with saddened hearts that we have to report the death of one of our faithful and active members, Lloyd Smith.

Lloyd was a community spirit who gave of himself for many causes, so it was no surprise when he became a member of the Stettler Elevator Preservation Society and put both feet into helping out wherever he could. One of his major self-appointed duties was as a host of the Coffee Stop on Wednesday mornings when the school bus drivers came in. Most of the drivers were women and he enjoyed teasing them while also giving them pet names. There was lots of laughter at the many stories of the experiences the bus drivers encountered and Lloyd loved it all.

When the idea of preserving the elevator was presented, Lloyd was part of the initiating group that attended the first meeting and from there he never stopped supporting it in whatever way he could, whether it was getting donations, donating himself, marketing memberships and much more. He is truly missed but we are grateful he has crossed our path.

We Have Gone Galactic

Through the dedicated efforts and many hours of work, **Mary Roy** has developed and set up a web site at www.stettlergrainelevator.com and a face book page at Stettler P& H Elevator Preservation Society. We hope to be able to keep our members informed on a timely basis and increase our exposure to the general public.

2011 Happenings

- Booth at Trade Show
- Tool room – cleaned, repaired, painted, new shelves installed, original items replaced.
- Feed mill area – cleaned the area and removed stored lumber.
- Display case – cleaned and items of interest displayed.
- Feed Mill drive through – cleaned and organized.
- Elevator & Feed Mill roof – new # 1 cedar shingles were installed. A major undertaking by a competent contractor and hard- working volunteers completed the job with excellent results. Great job – THANKS EVERYONE!
- Electrical project – to provide proper circuits, wiring, lighting, etc. in the feed mill and feed shed. Project started but stopped when the cold weather became an issue.
- Hosted Sask. Historic Bus Tour and other groups.
- Feed shed was used for a number of meetings & gatherings on a donation basis.

“Sun Alta Office”

“Tool Room – Before”

Plans for 2012

- Continue the electrical project
- Smoke detector system
- Restoration & installation of wagon lift
- Paint coal shed
- Create foundation & move the Sun Alta office to the site
- Shingle roof on present office
- Financially, we were able to shingle the roofs, etc. with the great community support and the help of Alberta Community Facility & Enhancement Programs received in 2010. We applied for another grant in 2011 which was declined due to the programs limited funds. We will apply again this year and if approved, use the funds to paint the elevator.
- In 2012, we will work at increasing the number of people that visit our elevator, especially those that come to ride on the train. However, we **need volunteers** who are interested in hosting, tour guiding and organizing this program. As the train attracts people from all over the world, it is a great opportunity to meet and greet a lot of people. Any interested parties, please contact us.

Only Grain Elevator in Town

The Sun Alta Elevator on the north side of town was dismantled in October 2011, making the P & H Elevator the last standing elevator in Stettler. We thank Dale Anderson for allowing us to acquire the Sun Alta Elevator office and relocate it to our site. This office was more typical of the earlier style of offices for elevators and will add to the elevator story we are trying to tell. It will also allow more display area for elevator items of interest.

In Memorial

<i>Jim Baugh</i>	<i>Clarence Blaney</i>
<i>Bill Chapman</i>	<i>Mae Dempsey</i>
<i>Earl A. Gibbon</i>	<i>Rudolph Hennel</i>
<i>Werner Krueger</i>	<i>Ken Penosky</i>
